

In-house design

Custom manufacturing of foundation beams | 41 Litice

Key Features

Trademark	Dimensions (cm)		
	L	B	H
ZV 011	*	*	*

* - as per the project documentation, without any limitations

Usage

Prefab foundation beams are used to speed up the construction process and reduce the construction labour intensity when laying prefab shells. The element dimensions are designed for commonly used pole dimensions and the dimensions of skeleton structures space layout.
