Unit T 450 | 41 Litice

Key Features

Trademark	Dimensions (cm)					Concrete Class	Volume (m ³)	Weight (kg)
	L	B	H	B_1	H_1			
IZT 500/19	149	240	450	19	17,5	C 30/37-XF1	2,4822	6080

Usage

T 450 component is intended for making buttresses when storing round timber, wood chips, sawdust and bark in wood-processing industry.

When using a single element 3m round timber can be stored, using the set of two pieces enables storing 5m round timber up to the maximum length of 6m. When using elements set in a row the space enables storing wood chips or sawdust and bark, again up to maximum height 6m.
